# Based on experience, de

The new **Delta-Cast® Saw** and **Delta-Cast® Vacuum** have been developed with a close insight into the procedures in the cast room. The result of studies and enquiries among cast technicians and practitioners have greatly influenced and inspired the design of this new cast saw and vacuum unit. **Wishes and demands** voiced by key opinion leaders, doctors and cast technicians have been directly incorporated into the design in order to make daily work in the cast room easier, **more convenient and healthy**.

Evaluations after the introduction of **Delta-Cast® Saw** in 2011 show how well the **new design** has been received. Clinicians rated most features (ease of use, weight, noise, vibration, blade change & access) **significantly better** than the saw model they were currently using.
